Dear Fellow Tilapia Enthusiasts,

Winter has arrived, and we can be grateful for the extended summer we've enjoyed. The long-awaited elections are over, and while the results may still pose some uncertainty, one thing is clear: South Africa cannot afford to wait passively; we must take action to shape our future. As a nation of resilient and dedicated people, as demonstrated by our participation in the elections, we must unite and drive South Africa forward. This entails focusing on jobs, skills development, taxes, infrastructure and institutional investments, education, health, housing, roads, rail, electricity, and more.

Our commitment to the aquaculture sector remains steadfast.

In line with this, we are offering free online training with every APU system purchased. This training includes learning materials in digital format and two sessions of two hours each, covering the essential aspects of Tilapia farming. These sessions will address your questions, help you develop a farm plan, a marketing strategy, a detailed production plan, farming processes, and financial insights.

To learn more, please visit our website and use the 'Contact Us' page to get in touch. We will provide you with more details and costs based on your farm's specifics, including your project scope, budget, vision, mission, and purpose.
